# NDEV Mobile Service Tiers

**Silver** for developers who are interested in basic ASR and TTS features  
*free offer*

**Gold** for developers who are interested in advanced functionality and require higher user and/or transaction volumes

**Emerald** for developers and customers who are interested in engaging with Nuance Professional Services to create a custom tailored package

# NDEV Mobile Case Study – iTranslate

## Universal Translator

- “iTranslate is a universal translator for your iPhone, with over 50 languages, dictionaries, text-to-speech and voice recognition. With the new Conversation Mode you can even talk into your phone and it talks back in another language.”

## Two input modalities

- Say It
- Type It

## Launched in January 2009

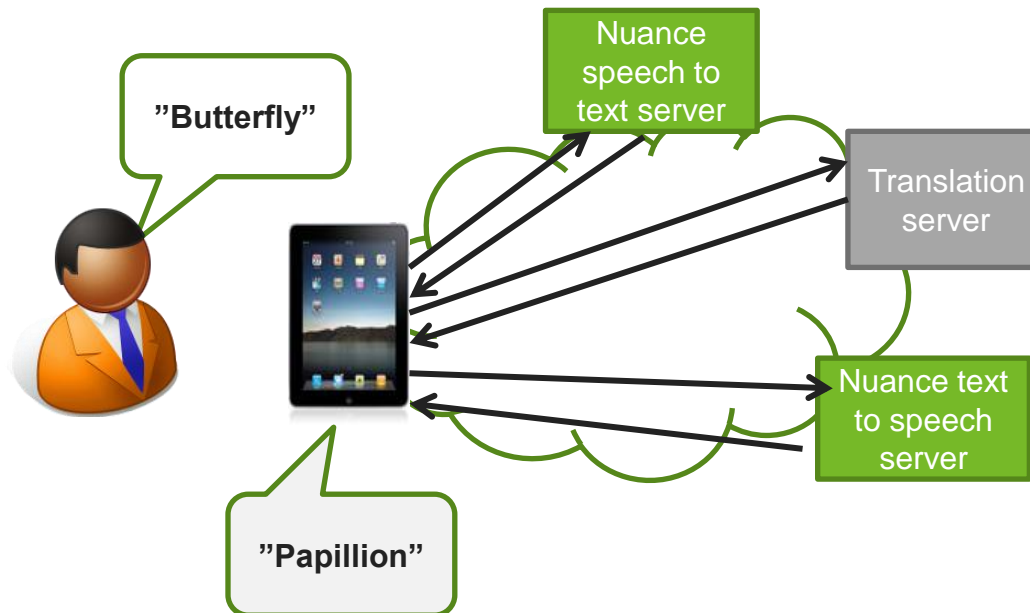

## User Feedback

- *“I think this is a beautiful way to quickly learn any language you're interested in”*
- *“This is a pretty cool application. It works well.”*

**NDEV Gold Customer utilizing Dictation ASR**

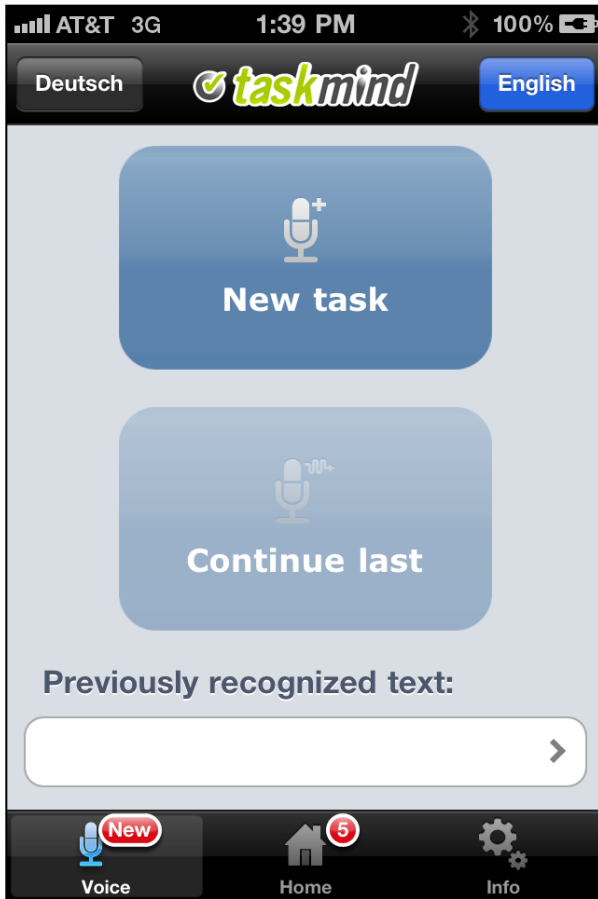

# NDEV example - iTranslate

- Demo

# NDEV Mobile Case Study – taskmind

## Productivity App

- “Taskmind is a permanent companion on your iPhone or iPad and helps you get your workday tidy. It is your central store for important tasks, projects, and appointments - always within reach. Collaborate with your colleagues anywhere.”

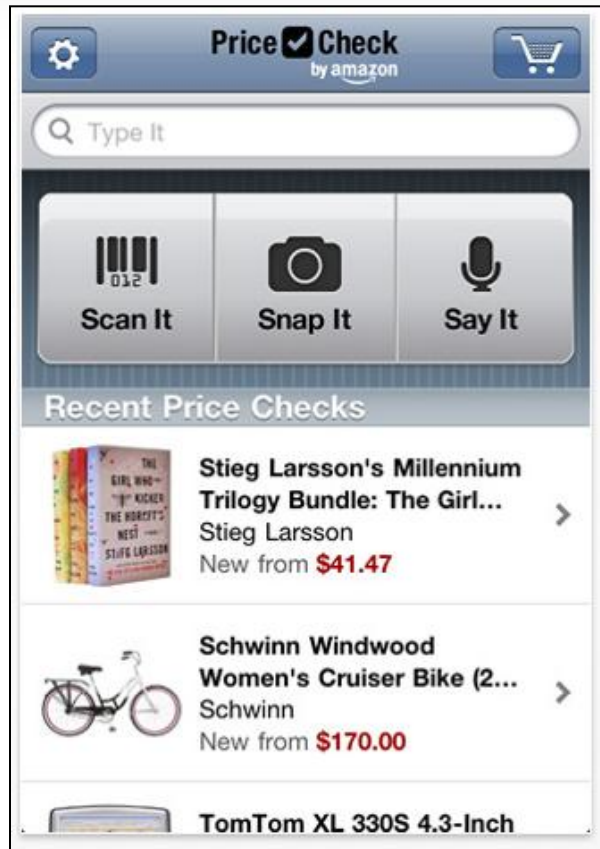

Launched in February 2011

## iTunes Reviews

- *“Finally a voice activated task scheduler. I now have an easy way to capture my thoughts and notes during the day.”*
- *“Dragon Dictation makes this app amazing.”*

**NDEV Gold Customer utilizing Dictation ASR**

# NDEV Mobile Case Study – Amazon Price Check

## Price Comparison App

- “With Price Check by Amazon, you can use your iPhone to instantly compare prices with Amazon.com and its merchants while on-the-go.”

## Four input modalities

- Scan It
- Snap It
- Say It
- Type It

Launched in November 2010

## iTunes Reviews

- “Really like this app. I’m addicted to ‘talking’ into it and having it find the item. Nice job!”
- “This app is great and the speech recognition is super fast and accurate.”
- “Very accurate.”

STEVEN SPIELBERG Presents

**NEAR**

# **BACK TO THE FUTURE™**

# Some near future areas for speech technology

- Speech Technology and Natural Language Understanding
  - E.g. Dragon GO!
- Speech Technology and Artificial Intelligence
  - The Siri personal assistant - for everybody
    - understands context and connects to location, for the common man
  - Watson – for special usage – e.g. doctors expert system
    - Deep Question Answering (QA), natural language processing and machine learning with Nuance's speech recognition and clinical language understanding software.
- Speech Technology in the connected living room
  - Search movies, music, the internet
  - Command and control

# IBM Watson: The Jeopardy! Experience

*Natural language understanding by Nuance*

# IBM Watson's next adventure:

## Healthcare with Nuance

- IBM and Nuance Communications have launched a research program to commercialize Watson for the healthcare industry.
- Nuance has a big footprint in the healthcare market where voice recognition is common.
- The plan for IBM and Nuance is to combine Big Blue's Deep Question Answering (QA), natural language processing and machine learning with Nuance's speech recognition and clinical language understanding software.
- The overall goal for Watson is to sort through volumes of data to help physicians find answers, previous cases and reference material.

**NUANCE**
